

# Wisbroek Softbill Diet (Small & Large)

## Characteristics

Small: extruded complementary feed for:

**Tanagers, honeyguides, pittas, broadbill, manakins, starlings, birds-of-paradise, flycatchers and doves.**

Large: extruded complementary feed for:

**Turacos, toucans, aracaris, hornbills, cotingas, starlings, trogons, oropendolas, birds-of-paradise and doves.**

## Advantages

- ✓ Extruded complementary feed for **fruit-eating** birds.
- ✓ **Small (±2 mm)** and **Large (±7 mm) extruded feed** for small and large fruit eating birds respectively. Both sizes can be used together, as they are the same in composition.
- ✓ Can be fed **dry and wet** and has a water stability of over 24 hours.
- ✓ **Iron content guaranteed at less than 85 ppm**. Each batch is analyzed by an external laboratory. Check out the iron level of your batch number on [www.wisbroek.com](http://www.wisbroek.com).
- ✓ **DHA fatty acids** are added for optimal health and breeding conditions.
- ✓ **Diversity in raw materials** to obtain a complete feed which, besides fruit, does not need any additions.
- ✓ Use of raw materials rich in **natural carotenoids** (luzerne, carrots, beetroot, spirulina, corn and corn gluten) which will enhance the natural coloring of the birds.
- ✓ Most minerals are added to the feed in **organic (chelate) form** for optimal bioavailability.
- ✓ **Prebioticum** added as lactose.
- ✓ 35% of the fatty acids are PUFA's (**poly unsaturated fatty acids**).

## Feeding guideline

Feed fruit eating birds additional to their daily portion of fruit ad libitum with Wisbroek Softbill Diet.

*Is Wisbroek Softbill Diet new to the bird?*

Provide Wisbroek Softbill Diet mixed with fruit. Be aware of the fact that 100 g of fruit contains approximately 85 g water. Dry Wisbroek Softbill Diet contains only 8 g of water per 100 g.

In addition, vary in fruits provided. For example, combine fruits with different carbohydrates: grapes (glucose, fructose) with mango (saccharose) or pear (fructose) with banana (starch). Feed extra banana to breeding birds, as they require extra energy for reproduction and have a higher requirement of Selenium, as well as to sick birds that are in need of extra energy.

## Analytical constituents

Crude Protein	22%
Crude Fat	8%
Crude Fibre	2,2%
Crude Ash	5,7%

## Additives - Colourants

β-carotene	10,0 mg/kg
Canthaxanthine	7,5 mg/kg
